Warning: **Forbidden for minors.**

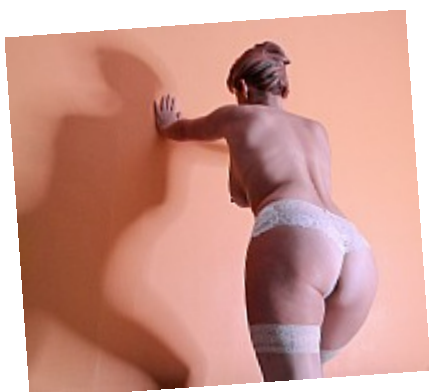

Artistic nude is **controversial** in photography, like all depiction of nudity in general. Many only perceive a sexual aspect, thus missing the natural beauty of the model, or the photographer's work.

I insist on the word artistic: I only see beauty, and let disgruntled people heating up alone.

Women are among the most ravishing creations of nature, so why not celebrating them in their birthday suit, in which they are the most beautiful?
