Artistic nude photo gallery in true fake 3D

Topics:  [3D](#)  [Artistic](#)  [English](#)  [Gallery](#)  [Nude](#)  [Photo](#)

Using the [depthmap](#) method to transform already existing artistic nude photos, the **3D** effect brings more depth to them.

With or without 3D glasses, (re)discover my [artistic nudes](#) from a different point of view!

Be sure to check [how to visualize](#) the 3D photos.

Lean back (original) ©AbsurdePhotonThe bookcase is still shaking!

Lean back 3D (colour anaglyph) ©AbsurdePhotonThe faded colours almost give an impression of black & white

Lean back 3D (cross-eyed anaglyph) ©AbsurdePhotonWho wouldn't squinch watching this scene?

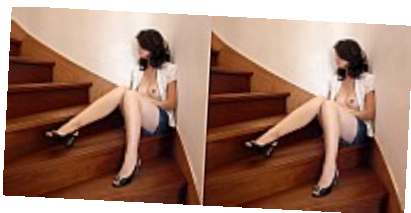

Lean back 3D (animated) ©AbsurdePhoton''C'est une poupée qui fait non-non-non'' (French song)

To the corner (original) ©AbsurdePhotonMaybe she was punished?

To the corner 3D (colour anaglyph) ©AbsurdePhotonRed/cyan conversion suits this photo well

To the corner 3D (cross-eyed anaglyph) ©AbsurdePhotonWhat did she do to end like this?

To the corner 3D (animated) ©AbsurdePhotonThe corner is a central element here

In the valley (original) ©AbsurdePhotonThe valley was so steep-sided that no light could get into it...

In the valley 3D (colour anaglyph) ©AbsurdePhotonThe low-angle shot exaggerates the impression of depth

In the valley 3D (cross-eyed anaglyph) ©AbsurdePhotonMy eyes can't focus!

In the valley 3D (animated) ©AbsurdePhotonToo bad that the right side is so blurry, the algorithm didn't like it

Wild strawberries (original) ©AbsurdePhotonWho would expect to find wild strawberries here?

Wild strawberries 3D (colour anaglyph) ©AbsurdePhotonThe most difficult part was to guess the table & floor depth values

Wild strawberries 3D (cross-eyed anaglyph) ©AbsurdePhotonYou have to squinch on the good parts of the photo...

Wild strawberries 3D (animated) ©AbsurdePhotonIt's almost a belly dancing video

On the look-out (original) ©AbsurdePhotonWhat is she looking at?

On the look-out 3D (black and white anaglyph) ©AbsurdePhotonThe black & white versions is much better in 3D than the colour original

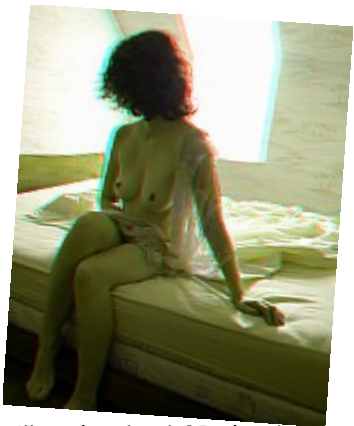

On the look-out 3D (cross-eyed anaglyph) ©AbsurdePhotonThe angle of view serves this 3D version well

On the look-out (animated) ©AbsurdePhotonLike a boat, pitch & toss

Illuminated (original) ©AbsurdePhotonIn spite of the bright light, the ambiance of the photo is very soft

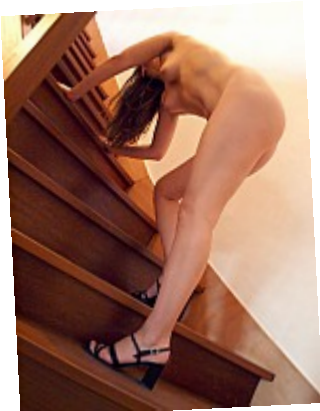

Illuminated 3D (colour anaglyph) ©AbsurdePhotonThis version is darker than the original

Illuminated 3D (cross-eyed anaglyph) ©AbsurdePhotonThe light coming from the background gives an impression of great depth

Illuminated 3D (animated) ©AbsurdePhotonThe bed is like a turning tray offering the strangest meal

Sisyphus (original) ©AbsurdePhotonAs a punishment for his trickery, Sisyphus was made to endlessly roll a huge boulder up a steep hill, always rolling away from him before he reached the top

Sisyphus 3D (colour anaglyph) ©AbsurdePhotonI like the distorted look of the stairs

Sisyphus 3D (cross-eyed anaglyph) ©AbsurdePhotonLet your eyes adjust slowly to

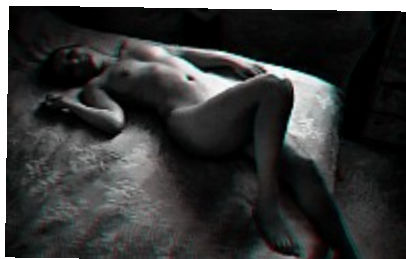

the depth planes

Sisyphus 3D (animated) ©AbsurdePhotonThe stairs angle spin strangely when animated

Pinup painting (original) ©AbsurdePhotonThe reinforced shades, allied with the touches of painting, have transformed the original photo into an artistic nude painting, which you could almost hang in your sitting-room

Pinup (black and white anaglyph) ©AbsurdePhotonThe photo was converted to a painting to a 3D scene, but in black & white it looks like a photo!
